Lot 1385 Batu 22 ½, Banting, Selangor

Hiring Manager**Friday, 17 March 2026**

Dear Hiring Manager,

I am writing to express my interest in an internship position in the field of automation, robotics, and sensor-based systems. I am currently pursuing a Bachelor of Engineering Technology (Automation and Robotics) at UniKL Malaysia France Institute, where I have gained hands-on experience in embedded systems, sensor integration, and industrial automation.

During my internship at TXMR Sdn Bhd, I was involved in the installation and commissioning of a robotic arm welding system. My responsibilities included system calibration, electrical wiring, and on-site testing. I also assisted in troubleshooting sensors and actuators, which contributed to improving system reliability and reducing operational instability during commissioning.

In addition, I have worked on several engineering projects involving sensor-based control systems. These include a Mecanum-wheel mobile robot utilizing IMU-based feedback for slope navigation, as well as a combat robot project where I performed structural simulation and impact analysis to improve durability. These experiences strengthened my ability to integrate mechanical design, embedded control, and sensor feedback to address practical engineering challenges.

Alongside my academic work, I am currently working part-time as a Mechanical Design and Procurement Assistant at FICES Technology. In this role, I design prototypes, select technical components, and support fabrication processes for IoT-based systems. This exposure has allowed me to understand the full product development cycle, from design and component selection to fabrication and implementation.

I am eager to apply my technical knowledge and practical experience in a dynamic engineering environment. I am also keen to further develop my skills while contributing positively to your organization.

Thank you for considering my application. I would welcome the opportunity to discuss how I can contribute to your team.

Warmest regards,

Husin Bin Hamdan
